

How-to-Measure Footwear for Men and Women

Closely trace the outline of your foot on a sheet of paper that is longer than your foot. Be sure to keep the pencil/pen vertical when tracing. Mark the length and width of your foot and measure in inches. Repeat these steps for your other foot and use the larger of the two. Use the size charts below to find your measurement and matching footwear size.

First select your foot length to determine your shoe size, then select the appropriate width according to your size. Select an extra wide width if your foot is wider than the listed options. If your measurement is between chart numbers, we recommend choosing the larger size for a comfortable fit.
